

Seahorse

Directed by: Lodovico Prola
Produced by: SD Cinematografica & Ditta Prola
Duration: 8'
Versions:  
Format: SD

We have long narrow snouts and our little mouths are adept at sucking our food just like with a straw. There are 33 species of seahorse in the world, of differing colors and shapes. It's a trick even we know well, we're pygmy seahorses, we're tiny and reach a maximum length of 2.5 centimeters. But here's the real surprise...among seahorses, we males are the ones who watch over the eggs and take care of the little ones!!
